Data Bootcamp: Class #1
Revised: October 23, 2014

Overview

- Data. We live in a world that's ...

- Programming. To make sense of the data, you need to be able to code: to write computer programs to put the data in a form that ... Be forwarned: you are expected to write programs in this course. This can be incredibly frustrating and requires enormous patience. If that's not your thing, you should not take this course.

- Graphics.

What I expect:

Work. Code.

Background. My target audience is one with minimal coding experience.
